Word Study for ---ZEBULUNITES

A photograph of a gnarled, twisted tree trunk, likely a juniper, in a desert landscape. The trunk is heavily textured with deep grooves and curves, and is surrounded by other similar branches and sparse desert vegetation. The background shows a sandy, arid environment with some low-lying shrubs.

**Num 26:27 These I are the families of
the Zebulunites according to those
that were numbered of them,
threescore thousand and five hundred.**
